DETAILED ACTION

This action is issued in response to amendment filed 11/25/08.

Response to Amendment

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Lowell Anderson 949-855-1246 on Dec. 12, 2008.

Claim 1, limitation e. line 8 replace the "may be" with "will then be".

Allowable Subject Matter

The following is an examiner's statement of reasons for allowance: The prior art of record, or that encountered during search by the examiner, fails to anticipate, or suggest the claimed provision of A system for parsing unstructured, or partially structured, name and address data in any language and script so as to produce structured name and address data; said system comprising: a. Knowledge base which analyses said unstructured or partially structured, name and address data at a number of levels, including at a lexicon grammatical level and an orthographic level and a semantic level and a contextual level, wherein linguistic theory enables

the complete representation of all possible forms of said data; b. Computer readable medium, wherein said knowledge base is stored upon said computer readable medium; c. Knowledge base using a knowledge representation language wherein said knowledge base can build a complete representation of all possible forms of said data provided in any language and script, from any country; d. Knowledge base containing a knowledge representation layer, a knowledge base management layer, a language programming interface layer and a language inference layer containing an inference engine; e. System processing at least portions of said unstructured or partially structured name and address data in an incremental manner, involving multiple parsing steps, whereby at each parsing step said inference engine utilizes an inference strategy, represented within a number of inference modules that reason about the language knowledge based on knowledge instances maintained in the knowledge base management layer, to build a body of executable knowledge about patterns contained in said data, thus producing more structured data that will then be submitted to further parsing steps until fully structured data is produced, as claimed in independent claim 45, in conjunction with remaining claim provisions.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Comments

The date on which the petition under 37 CFR 1.136(a) and the appropriate extension fee have been filed is the date for purposes of determining the period of extension

and the corresponding amount of the fee. In no case may an applicant reply outside the SIX (6) MONTH statutory period or obtain an extension for more than FIVE (5) MONTHS beyond the date for reply set forth in an Office action. A fully responsive reply must be timely filed to avoid abandonment of this application.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

As allowable subject matter has been indicated, Applicant's response must either comply with all formal requirements or specifically traverse each requirement not complied with. See 37 CFR 1.111(b) and MPEP section 707.07(a).
